

OBJECTIVES

- To study the suitability of using multimodal biometric system compared to single modal approach.
- To develop attendance system using multiple unit approach and test the algorithm proposed.
- To study the trust ability of multimodal biometric system.
- To find the approach in retrieving biometric data from database

CONTRIBUTIONS & COMMERCIALISATION

The system can be enhanced to securities system such as military entrance system, industries etc.

POTENTIAL

The data can also be used to develop Fuzzy Multimodal Biometric System
